

Job Description		 <b>Complete</b> <b>ASAP</b> <i>Keeping Things Moving</i>
Job Title	Technical Business Analyst	
Reports to	Business Systems Manager / CTO	
Direct Reports	N/A	

Summary of Position
Complete ASAP is the UK's leading sales progression business, supporting Estate Agents, Auction Houses and Mortgage Brokers with an outsourced service.
The Technical Business Analyst bridges business operations and technology, designing, documenting, and delivering digital solutions that streamline processes and enable teams to work effectively.
The role is hands-on, combining business analysis, process design, and structured delivery, with a focus on low code and no code automation, operational reporting/MI (e.g. PowerBI), and system improvements across the business.

Core Duties
<ul style="list-style-type: none"> <li>Understand and document current operational processes across teams</li> <li>Identify inefficiencies and prioritise opportunities for simplification and automation</li> <li>Design future-state workflows and define clear functional and technical requirements</li> <li>Manage delivery across the full system development lifecycle, from requirements through to rollout and adoption</li> <li>Build straightforward automations using low-code and no-code tools</li> <li>Responsibility for operational reporting and management information (MI), including dashboards, measures, and governed KPI definitions</li> <li>Coordinate with external technical partners for more complex development work</li> <li>Test, validate, document, and support user training to drive adoption</li> </ul>

Core Accountabilities
<ul style="list-style-type: none"> <li>Accurate process mapping and documentation of as-is workflows</li> <li>Well-defined to-be workflows with clear requirements and acceptance criteria</li> <li>Successful delivery of improvements and automations that reduce manual work and errors</li> <li>Effective stakeholder management across technical and non-technical teams</li> <li>Quality assurance through structured testing and validation</li> <li>Delivery of reliable reporting and MI that is trusted and used by operations and leadership</li> <li>Smooth rollouts supported by clear documentation, training, and adoption support</li> </ul>

- Ongoing contribution to a culture of process excellence and structured delivery
